LUIS GONZÁLEZ BERNAL

AI Engineer — Operations & Reliability

Madrid, Spain | +34 630 254 790 | luisgonzalezb93@gmail.com | luisgonzalezbernal.com | LinkedIn | GitHub

AI engineer with an SRE background. I build knowledge graphs, agents and evaluation pipelines that turn enterprise operational data (observability, ITSM, on-call and CMDB systems) into answers that can be audited. Strong foundation in Python, CI/CD and Kubernetes.

EXPERIENCE

TCS (contractor at Roche) *Madrid, Spain*
AIOps Engineer *10/2025 – Present*

- Led the design and built the core of an operational knowledge graph and ontology over the company's observability, ITSM, CMDB and on-call systems. It stores no data: every query resolves live from the systems of record. Exposed to AI agents via an MCP server and a web UI, with per-user audit and role-based access. Served 5,000+ queries, 90% from AI agents; 88% answered with data at 0.6 s p50 latency.
- Built an AI incident response agent (LangGraph, Claude, RAG + ChromaDB) that diagnoses incidents by correlating monitoring episodes, tickets and operational knowledge, and graduated it from L1 (suggest) to L2 (act under guardrails).
- Built the evaluation layer for agents and skills: gold/silver/bronze datasets from human-verified incidents, weekly LLM-as-judge runs and usage telemetry. Defined autonomy levels that gate what every agent can do unsupervised.
- Own a self-service recovery automation system: ~950 automated remediations/month across 4 orchestrators, used by 10+ teams to run their own recovery workflows.
- Designed and built a PagerDuty Account Vending Machine: self-service platform (Terraform modules, Terraform Cloud, GitOps with Python + Jinja2 + GitLab CI/CD), adopted as the team's production onboarding system.
- Built 15+ AI-powered skills automating sprint planning, incident management, documentation authoring and cross-system troubleshooting.
- Run the central alert-correlation and incident-routing platform for 50+ application teams.

Famytec (contractor at Roche) *Madrid, Spain*
DevOps / SRE — Team Lead *01/2022 – 09/2025*

- Ran the Rundeck automation platform at ~3,000 jobs/day and 99.97% SLI: built the CI/CD pipelines deploying it on Kubernetes (Ansible, Jenkins) and Python plugins for Splunk, ServiceNow and Vault.
- Built Autodispatcher, a neural-network ticket classifier based on 18 months of assignment history, cutting mean assignment time from 45 min to under 5 min (90%).
- Onboarded the operations center (GOC) and other teams onto Rundeck automation (e.g. bulk update of 600+ AWS accounts) through demo days and onboarding guides.
- Led a group of SREs embedded across client projects, setting engineering standards and best practices.

Haciendas Bio *Badajoz, Spain*
Backend Developer / Data Analyst (earlier: Agricultural Engineer, 2016–2017) *01/2018 – 12/2021*

- Shipped an ERP on AWS (Python, Django) for 40+ daily users, cutting data-recording time by 50%; built BI dashboards (R, SQL) that cut some activity costs by 20%.

SKILLS

AI & LLM: Claude, LangGraph, MCP (Model Context Protocol), RAG, ChromaDB, Knowledge Graphs & Ontologies (LinkML), LLM Evaluation (LLM-as-judge, golden datasets).

Observability & AIOps: Splunk ITSI, PagerDuty, ServiceNow, LogicMonitor, Alert Correlation.

DevOps & SRE: CI/CD, GitLab, Jenkins, Ansible, Docker, Kubernetes, Rundeck, Terraform, Git.

Backend & Data: Python, FastAPI, PostgreSQL, pytest, RBAC, JavaScript, Pandas, Django.

Cloud & Platform: AWS, GCP (Vertex AI), Linux, HashiCorp Vault.

Languages: English — Professional proficiency. Spanish — Native.

EDUCATION

Master in Digital Transformation, University of Córdoba (2019) · Master & Degree in Agricultural Engineering, Universities of Córdoba and Extremadura (2011–2017)

TEACHING & AWARDS

- **Teacher** (2023 – Present): AIOps and LLM agents, Python and algorithms, DevOps and CI/CD.
- **Copernicus Hackathon Málaga — 1st Prize** (2020): satellite imagery to predict mosquito and jellyfish outbreaks.
- **Emilio Botín Award — 1st Prize** (2020): Food & Farm Analytics, ceiA3 and Santander Universidades.
